

hello summer

hello summer

good things take time

beloved family

Light (φώς), Shade (σκιά) and recreation (αναψυχή)

Cool shade is a precious commodity under the blazing sun of Greece and people have always been seeking it daily after work was done.

Greek women are gathering with their mothers, sisters, aunts, daughters and friends under shadowy places for recreation and enjoying company but at the same time for creating meaningful and beautiful things with their nimble hands and needles. Inspiring one another, passing knowledge from generation to generation and becoming by the way very good at knitting, sewing or painting, an incredible handicraft power has emerged that has been underestimated.

Our journey began with my desire for uniqueness for our newly build house on a Cycladic island. I imagined pergolas and umbrellas that could let the air and light going through but at the same time providing good shade and being mesmerising. With my female family members we started working on that dream, enjoying the process to the maximum and feeling so proud of the outcome.

Having experienced these wonderful summer evenings and the love for designing unique, handmade, high quality pieces I came up with establishing Ilektras Croshade.

Our Mission

Bringing the desirable Mediterranean flair, in every balcony, garden and home, whilst supporting amazing women who are able to implement any ideas.

How we achieve it

With love for perfection and know-how we create every single piece by hand, elaborated out of eco-friendly materials, all produced in Europe.
